

ANDRO-SWITCH

HANDBOOK OF THE TESTICULAR SUPPORT
DEVICE
DEVELOPED BY THOREME

Affordable
Sustainable
Accessible

Does not protect from STIs
Few users
Not yet medically recognized

6 REASONS TO BECOME A USER

The thermal ring is made without textile. It is a unique circular penoscrotal device in silicon, specially conceived to optimise testicular support, i.e. maintain testicles in the inguinal canal, and facilitate the implementation of the thermal male contraceptive (TMC) method by testicular ascent.

Conceived and made in France

Patented, the result of 3 years of research of development, **handmade product**, sterilised prior to shipping.

Accessible

Available online, fast delivery wherever you are. Delivered without prescription, non-refundable.

Sustainable

No hormones, **100% catalysed platinum silicon, certified as biocompatible** for prolonged skin contact.

Affordable

It costs **37€**
Medical monitoring by the referring physician
Sperm analyses are medically prescribed and refunded.

Characteristics

Smooth and flexible
Light and discreet
Push up effect
Adherent internal structure
5 different sizes available (according to the circumference of the erected penis, as indicated by the table on the website for ease of reference)
Simple use
Personal use
Reusable, sustainable
Ergonomic
Comfortable
To be washed daily with mild soap

Practicability

Further support tools are available on the website to better assist you on the proper use of the device, comprehension of the method, choice of the size and medical assistance: videos, tutorials, user guides, etc

4 FACTS

We offer an innovating product **to democratise a new collaborative approach** of contraception

Eco-produced, committed to a low carbon footprint and low ecological impact.

Other tools of thermal male contraception are available (briefs, jock straps), more information on **ARDECOM's** website.

For a **natural thermal male contraception**
